

# DRIVOL ICE ENGINE COOLANT

## Product Description:

A high quality, corrosion-inhibited, ethylene glycol based automotive antifreeze/ coolant, designed to protect the cooling systems of water-cooled petrol engines.

## Key Features:

- Superior anti-foam properties.
- Excellent corrosion protection.
- Offers protection from freezing down to -45°C.
- Superior Heat Transfer hence better cooling.
- Provides excellent protection under normal ambient temperatures.
- No silicates, nitrates, amines, borates or phosphates, leading to improved stability and freedom from scale and deposits.

## Applications:

- Suitable for Vehicles with Aluminum Components.
- Compatible with: all natural & synthetic rubbers & painted surfaces of automobiles.

## Direction for Use:

- Not suitable for direct application.
- Requires dilution before its application; Dilute with soft water to achieve concentration of 50% for more effective cooling performance. In warm climates dilution up to 33% is permitted.

## Handling:

- Packed Product should not be stored above 60°C, exposed to hot sun or extreme freezing conditions.

## Specification / Recommendations:

International Standards & Meet the Requirements	
JIS K2234, ASTM D3306	

## Technical Data:

S. No.	Characteristics	Test Results
1	Color	Green
2	Boiling Point °C	200+
3	Freezing Point °C	-20
4	Specific Gravity	1.031
5	pH	8.2

## Manufacturing:

Manufactured in ISO 9001: 2015 and ISO 14001:2015 certified plant.

## Disposal:

Environment protection to be ascertained by proper disposal of Used coolant and empty container as per local country guidelines.
